

Im Gerätemanager den FIFO Puffer des COM-Ports deaktivieren:

Über Anchlusseinstellungen -> Erweitert:

So schaut eine erfolgreiche Verbindung in MagStripe aus:

The screenshot shows the MagStripe-Reader software interface. The title bar reads "MagStripe-Reader \*\*\* Demoversion \*\*\* V1.10". The menu bar includes "Shortcuts", "Settings", "License", and "More".

At the top, there are several controls: an "Open" button, a dropdown menu set to "1", a text field with "9600", a dropdown menu set to "N", and another dropdown menu set to "8". To the right, there is a green "DSR" button, a checked "RTS" checkbox, and an unchecked "DTR" checkbox. An "Autoread" button is also present.

Below these are a "Close" button, a text field containing "COM1 9600, N, 8, 1", a "Command Execute" button with a text field containing "00", and a "Send Raw" button with an empty text field.

A "Commands" dropdown menu is set to "Reset".

On the left side, there is a numbered list of buttons: "1. Wait4Insert", "2. Read Track", "3. Write Track", "Write all Tracks", "Reset Eject", and "4. Eject".

The main area contains two text boxes. The left box shows the following log output:

```
13:34:23: RX: 10 06
13:34:23: C/R: ACK
13:34:23: TX: 10 05
13:34:23: RX: 10 02 4E 3A 30 31 39 10 03 4F
13:34:23: C/R: Neg. response
13:34:28: GetData: Operation nur gültig, wenn der
Anschluß geöffnet ist
13:34:28: Closing: Gerät ist nicht geöffnet

13:38:00: TX: 10 02 43 30 30 10 03 40
13:38:00: TX: 10 05
13:38:01: RX: 10 06
13:38:01: C/R: ACK
13:38:01: TX: 10 05
13:38:03: TX: 10 02 43 3A 30 10 03 4A
13:38:06: RX: 10 02 50 30 30 30 30 10 03 53
13:38:06: C/R: Pos. response
13:38:06: Data: [□□S]
```

The right box shows a hex dump of the data received:

```
....N0018..D....N:019..
0....N:019..0....N0018.
.D....N:019..0....N0018
.D....N:019..0....N001
8..D....N3019..F....N:0
19..0....N0018..D.....
N0018..D....N:019..0...
...N:019..0.....N:019.
.0....P0000..S
```

At the bottom, there is a "Track Data" section with three checked checkboxes labeled "#1", "#2", and "#3", each followed by an empty text field.

The status bar at the bottom shows "State: Positive response" and "Connection: no".
